Amy

Hello! I was wondering if I could book a session with you tomorrow at 5pm

Sure Amy. I am available then. What do you need help with?

I am struggling with my assignment in MATA31.

Transcript

In this session, we explored the fundamental concepts of differential calculus, focusing on the definition and properties of the derivative. We began by revisiting the concept of a limit and its importance in defining the derivative of a function. The derivative was then introduced as the instantaneous rate of change of a function, and we discussed its geometric interpretation as the slope of the tangent line to the curve at a given point.
